Notes:

V = Verified by Certified Health Physicist.

U = Indicates the analyte was analyzed for but not detected.

pCi/g = picocuries per gram.

Analytical data is based on December 2013 site assessment conducted by Weston Solutions, Inc., Site Assessment Team (SAT).

S09 (36-48)* is a duplicate of S04 (36-48)

Values in red indicate exceedance based on the following criteria:

1) concentration equal or exceeds a value of 2 standard deviations above the mean site specific background concentration for that radionuclide.

2) concentration exceeds the upper-limit value range of regional background concentrations (approximately 0.5 pCi/g to 1.5 pCi/g was used to evaluate individual analytical results within each radionuclide).

3) significant values were established using professional judgment based on criteria 1 and 2.
